1. Introduction

This document presents the list of service functions. The service functions are available in the keypad after the service mode is started. Some of the functions are only available if certain devices are installed in the system (e.g. ACU-220 / ACU-280 controller or PERFECTA-RF module). Using the service menu you can configure most alarm system settings. In the square brackets you will find factory default setting (if the parameter is defined / option enabled).

1.1 Starting the service mode

1. Enter the **service code** (by default: 12345) and press **[* 0]**. User menu appears.
2. Press **[* 1]**.
3. When the **→** cursor shows the SERVICE MODE function, press **[# 0]**. Service menu will be displayed (the **→** cursor will show the END SM function).

1.2 Navigating through the menu and running functions

To navigate throughout the menu, you can use the arrow keys or number shortcuts. You can also combine the two methods. The cursor **→** shows the submenu you can enter / function you can run.

1.2.1 Using the arrow keys

1. Use the **[X ↓]** or **[* ↑]** key to find the required submenu.
2. Press **[* →]** or **[# 0]** to open a submenu (use the **[* 0]** key to go back to the main menu).
3. Repeat the steps 1 and 2 until the required function is found.
4. Press **[* →]** or **[# 0]** to run the function.

1.2.2 Using the number shortcuts

Submenus and functions are numbered.

1. Using the number keys, enter the number (use the **[C ←]** key to erase the last digit).
2. The menu item designated by this number will be displayed (use the **[* 0]** key to go back to the main menu).
3. Press **[* →]** or **[# 0]** to open a submenu or run a function.

If the cursor **→** indicates END SM and you want to quickly run a function, enter its number and press **[* →]** or **[# 0]**. For example, to run the device identification function, press successively **[2_{ABC}] [1] [# 0]**.

If the cursor **→** indicates an item different from END SM, the entered digit will be added at the end of the number by which the item displayed in the menu is designated. New digits are always added at the end of the number displayed (only the END SM function is not numbered). For example, if the cursor **→** indicates a menu item with the 31 (31.EOL) number, pressing **[3_{DEF}] [2_{ABC}]** in turn will display the 3132 (3132.Zn.32 EOL) item, not the 32 (32.SENSITIVITY) item. To display the 32 (32.SENSITIVITY) item, you should press **[X ↓]** (to move the cursor **→** down) or **[C ←] [2_{ABC}]** (to erase 1 and add 2).

If you remember the submenu/function number and you want to avoid mistakes, press **[* 0]** before entering the number.

1.3 Data editing

The editing method depends on the type of data. Having completed the editing, press **#** **↵** to save the changes. If you want to exit the function without saving the changes, press ***** **↵**.

1.3.1 Selection from the single-choice list

In the lower line of the display, the currently selected item is presented. You can scroll the list using the **X** **↓** and **P** **↑** keys.

1.3.2 Selection from the multiple-choice list

In the lower line of the display, one of the items you can choose from is presented. You can scroll the list using the **X** **↓** and **P** **↑** keys. The following symbol is situated in the upper right corner of the display:

■ – displayed item is selected / option is enabled,

· – displayed item is not selected / option is disabled.

Press any number key to change the currently shown symbol for another one.

Press **☀** **▶** or **◀** **☾** to enter the graphic mode.

Graphic mode

In the graphic mode you can see on the display the state of up to 32 items simultaneously. These can be zones, outputs, options, etc. The state is represented by the same symbols as in the basic mode. No symbol means that this item is unavailable and cannot be edited. The numbers around the display will help you identify the item. For items 33-64, the cursor is the flashing **■** symbol. This makes it easier to recognize which items are displayed.

Use the **☀** **▶** or **◀** **☾** key to move the cursor. When the cursor is on the item you want to edit, press any number key. A different symbol will be displayed.

In the graphic mode you can quickly change the status of all available items:

- if you press **0** **☉** 3 times within 3 seconds, the **·** symbol will be displayed for all items,
- if you press **1** 3 times within 3 seconds, the **■** symbol will be displayed for all items,
- if you press **2**_{ABC} 3 times within 3 seconds, you will switch all the items to the opposite state (all the **·** symbols will switch to **■**, and the **■** symbols will switch to **·**).

If you press **☀** **▶** when the cursor is on the last available item, the state of the next 32 items will be displayed. If you press **◀** **☾** when the cursor is on the first available item, the state of the previous 32 items will be displayed.

Press **X** **↓** or **P** **↑** to exit the graphic mode and return to the basic mode.

1.3.3 Entering decimal values

To enter digits, use the number keys. Use the **☀** **▶** and **◀** **☾** keys to move the cursor. In some functions, the **P** **↑** key deletes the character on the left side of the cursor.

1.3.4 Entering hexadecimal values

To enter digits, use the number keys. To enter the A, B and C characters, use the **2**_{ABC} key, and to enter D, E and F, use the **3**_{DEF} key (keep pressing the key until the required character appears). Use the **☀** **▶** and **◀** **☾** keys to move the cursor. The **P** **↑** key deletes the character on the left side of the cursor.

1.3.5 Programming telephone numbers

To enter digits, use the number keys. To enter the +, *, # characters, use the **0** key (keep pressing the key until the required character appears). Use the **☀** and **☾** keys to move the cursor. The **☒** key deletes the character on the left side of the cursor.

1.3.6 Entering names

The characters that can be entered by using the keys are presented in Table 1. Keep pressing the key until the required character appears. Long press the key to display the digit assigned to it.

Shown on the right side in the upper line of the display is information about the letter case: [ABC] or [abc] (it will be displayed after pressing any key and will be visible for a few seconds after the last keystroke).

Use the **☀** and **☾** keys to move the cursor. The **☒** key deletes the character on the left side of the cursor.

Key	Characters available after next keystroke																		
1	!	?	'	`	←	"	{	}	\$	%	&	@	\	^		☒	#	1	
2 _{ABC}	a	b	c	2															
3 _{DEF}	d	e	f	3															
4 _{GHI}	g	h	i	4															
5 _{JKL}	j	k	l	5															
6 _{MNO}	m	n	o	6															
7 _{PQRS}	p	q	r	s	7														
8 _{TUV}	t	u	v	.	☒	☒	☒	↑	←	→	↓	8							
9 _{WXYZ}	w	x	y	z	9														
0 ☑	.	,	:	;	+	-	*	/	=	_	<	>	()	[]	0		

Table 1. Characters available when entering names. The upper case letters are available under the same keys (to change the letter case, press **☒**).

1.4 Hiding the service mode

You can hide the service mode by using the 09.HIDE SM function. The control panel will remain in the service mode, but the service mode menu will not be displayed. The function can be useful e.g. when you have to leave the keypad, but you want to prevent unauthorized personnel from getting access to the service menu in the meantime. To get access to the menu again, proceed in the same way as when entering the service mode.

1.5 Exiting the service mode

Keep pressing ***☑** until the cursor **→** indicates the SM END function, and then press **#0**.
